

The patients tell their stories to our bots.

From 1 to 10, how bad is it?

Around 10

Then we tell their
stories to caregivers.

♥ Healthcare in 2017

- ♥ Communication between patients and caregivers still poses a major challenge. Patients feel rushed and not heard.
- ♥ Caregivers are overwhelmed by paperwork and record keeping instead of doing what they do best: care for patients.
- ♥ With population ageing and ever limited resources, we're approaching a crisis. We need to see more patients...faster.
- ♥ Healthcare's businesses across the globe are looking for innovative ways to "touch" more patients and fill the communication gap between them.

Tailor your patients stories
with our Botbuilder.

Storydoc developped an intuitive
toolkit to reinvent storytelling.

12 questionning mechanisms

You can even ask patients for
payments.

Powered by **stripe**

Push their stories to your
platform with our rest API.

Fewer clicks lead to better care.

A caregiver's attention when reading
a patient story should stay focused
on the platform they love best...
yours.

HIPAA & PHIPPA compliant.

Goodbye boring questionnaires.
Hello Chatbot.

Healthcare's centerpiece of decision
making is the patient story.

We thrive to engage patients
through the most natural and
synthetized storytelling experience.

Full-fledged white label. Your colors,
your logo... your culture.

REST API

Volume pricing SaaS {per patient story}

Number of patient visits per year

176M / year

1.1G / year

Triage, pre-visit assessments, automated follow-ups,
clinical trials, insurance tele-underwriting...

Our bots possibilities are **endless**.

Vincent Dumouchel

Current Storydoc lead designer.
Was Apple floor specialist.
Was Telus Health EMR consultant.
Knows how to make it happen.

Storydoc truly makes sense
when you push Vincent to tell
you he's a family doctor too.

Dominique Lebel

Current BHVR SVP & CSO
Was Cossette exec VP.
Was Quebec PM Chief of Staff
Knows a lot of cool people.

Vincent Lamanna

Current BHVR CPO
Was Salesfloor CTO
Was SSENSE CTO.
Knows how to code stuff.

The budget wasn't there but the
idea's scalability and public image
coolness was.
